TKH INDEPENDENT SECOND MEDICAL OPINION

Are you confused by different recommendation from attended doctors?

Comparisons have revealed that doctors often give different advice and represent different points of view. For example, one doctor may clearly advise quick surgery, while another may be more cautious. While both perspectives may have merit and valid treatment options, it's natural to feel frustrated and uncertain amidst the disparity.

For many health conditions, there is more than one treatment option.

Even surgery often has alternatives. Deciding whether to undergo an operation, a stressful diagnostic procedure, or a serious treatment is not always easy. It is important to understand the pros and cons of different treatment strategies. Without knowledge, your decision can never be fully informed and feel comfortable for you. A second medical opinion is useful when making a health decisions.

TheKnowHow Independent Second Opinion Service

guarantees that the second opinion is provided by a highly specialized expert in the medical field. In addition, our experts are not allowed to work in the same clinic as your doctor, and they must not be employed in the hospital where the therapy is to take place. This precaution ensures, that you as a patient can rely that you get a highly competent, honest, and unbiased answer to the questions that concerns you.

How it works?

Our international experts are trained in record based medical assessments. It is important that our experts understand your medical condition. They rely on the medical information you provide: your doctor's letter including your medical history, current complaints, diagnoses, radiology scans, medications, and current treatment plan of your primary doctor.

Our portal easily allows you to upload your medical reports. Be assured that your data is stored on a server within the UAE under strict data protection rules. All personal data will be removed before sending your documents to our experts. Within few days you will receive the second opinion through our office. The report describes all relevant diagnostic or treatment options based on the actual evidence-based medical guidelines with their advantages and risks to support your informed decision how to proceed.
